

## How It Works

### TGS-Plus Mobile System

A revolutionary complete battery-powered system that is cost effective and easy to use. System has a 200 ft maximum range and is ideal for groups from 10 to 300 participants.

#### 1 Presenter Wireless Unit

Your presenter uses the wireless lapel microphone to send their voice directly to the interpreter's wireless Monitoring Unit. This provides the advantage of your interpreter being able to hear completely and accurately. Presenter Unit can be connected to existing sound system to send feed of entire sound system directly to interpreters.

#### 2 Monitoring Unit & Interpreter Transmitter

Your interpreter connects their headset microphone to the wireless Monitoring Unit to receive a direct feed of the presenter's voice into their headset. This allows the interpreter to hear completely and accurately. The interpreter's microphone in connected to their transmitter to broadcast a wireless signal of the target language throughout the room.

#### 3 Receivers and Headsets

Receivers & Headsets for used by participants provide excellent reception and allows audience members to sit anywhere in the room they choose. Receivers have independent volume control and come with executive folding headsets allow for best sound quality. Receivers use 2 - AA batteries

#### Accessories

EAR022

EAR008

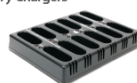

EAR013

NKL001

Battery Chargers

ProCell® AA Batteries

Omni-Directional Room Microphone

Recommended Configuration (shown above)

- 1 - Wireless Monitoring System
- 1 - Headset Microphone
- 1 - Wireless Transmitter
- 10 - Receivers & Headsets
- 1 - Rolling Carrying Case
- 24 - AA Batteries

### Why Use Monitoring Equipment?

Simultaneous interpretation requires the use of MONITORING EQUIPMENT for any size meeting. Monitoring is the ability to provide the interpreter a feed of the presenter's voice directly into the interpreter's headset in such a way that your interpreters can hear far more accurately as compared to listening naked-ear. For best performance proper monitoring is essential for best quality interpretation.
