

Portable FM Interpretation System

The VP-T100 is complete transportable solution with the ability for an interpreter to monitor the presenter/s directly in her headphone (this greatly enhances concentration and quality of interpretation) and in turn enables the interpreter to broadcast the target language wirelessly in almost any size room.

The VP-T100 can be customized for to accommodate up to eight (8) languages. The VP-T100 can be upgraded to broadcast to over 1,000 listeners. This system is easy-to-use and dollar-for-dollar the most complete system available anywhere at this price level.

More sophisticated systems are available; please call a representative for assistance.

Price \$2,691.40
